

Eaton Technologies - openings

About the company

Eaton is a diversified power management company providing energy-efficient solutions that help our customers effectively manage electrical, hydraulic and mechanical power. A global technology leader, Eaton acquired Cooper Industries plc in November 2012. The 2012 revenue of the combined companies was \$21.8 billion on a pro forma basis. Eaton has approximately 103,000 employees and sells products to customers in more than 175 countries. For more information, visit www.eaton.com

In 2003, Eaton Corporation, USA embarked on a journey to set up a best in class engineering center in Pune – the Eaton India Engineering Center (EIEC). The center has completed its first phase of growth and has emerged as a major product engineering, design development center for Eaton’s global customers – primarily in North America, Europe and Asia-Pacific regions. EIEC would like to invite applicants for Engineering and Technology Leadership Program (ETLP).

Engineering and Technology Excellence is the foundation of innovation and new product development. As a response to our commitment to functional excellence, we have designed a rotational development program focused on developing Eaton’s technical leadership talent pipeline. The Engineering and Technology Leadership Program (ETLP) will prepare participants for future functional and/or technological leadership positions by offering value added rotational assignments in which candidates will have the opportunity to gain engineering design and development experience with Eaton’s new products and technologies.

Rotation Structure: There would be two to three roles in different business divisions, technology areas and experiences will be focused on new products and cross business innovations within the four business groups and the corporate innovation center.

Leadership Exposure: Participants will have a high level of interaction with EIEC Leadership team. Participants will be expected to formally present project updates to Engineering Leadership and will receive multiple opportunities for networking and formal training. Training needs will focus on both technical competencies as well as leadership competencies.

Sample Post-Program Position: Graduates of the program should be ready for key engineering roles, ranging from product design and engineering to program management.

Basic Qualifications (Including Educational Requirements)-

We look for Candidates who have engineering management and/or technology leadership aspirations, as well as a passion for innovation technologies. Interested candidates must possess outstanding academic credentials, strong analytical skills, have excellent written and oral communication skills, and have demonstrated a strong desire and ambition to be a leader.
