

Opera Solutions, Noida is hiring for "Analytics Specialist" & "Senior Analytics Specialist" roles

1. Analytics Specialist

Role & Responsibilities -

- Analytics Specialists (ANS) support Opera's efforts to develop and deploy state-of-the-art, data-driven predictive models to solve business problems.
- Successful ANS will have a strong academic background in a quantitative discipline and a good track record of applying advanced classes of models to difficult problems.
- They will be creative problem-solvers, thinking beyond their own disciplines to find innovative new modeling approaches.
- They will also be energized by applying analytics to real-world business situations and producing measureable improvements for clients.
- They will be comfortable with ambiguity and truly enjoy the challenge of creating new solutions for difficult Big Data problems.
- ANS may work on a specific portion of the analytic challenge, or, as their capabilities allow, extend their focus more broadly within a client assignment.

2. Senior Analytics Specialist

Role & Responsibilities -

- SAS have significant interaction with senior clients and client team members, playing a wide range of critical project roles.
- Assisting on proposal development
- Formulating key analytic approaches
- Leading small project teams
- Taking responsibility for large portions of analytic activities
- Managing data capture and analysis, and identifying key insights
- Developing core recommendations and structuring storylines and presentations
- Working collaboratively with Opera and client team members to capture improvements and implement positive changes.

Skills Required for both the Roles –

- Candidates should have an excellent academic record from a competitive academic institution.
- Bachelor's degree (BS, B Tech, BE or equivalent) in a quantitative field (i.e., Statistics, Engineering, Machine Learning, Physics, Econometrics, etc.)
- We also prefer, candidates with strong analytics and programming background, as well as user experience with statistics packages, SAS / R / Python / SPSS.

Thanks & Regards,

Sowmya Francis
