

You could join a job that does any of these...

Sell books online

Order a cab

Deliver delicious food

All of these are good things to do. But along with compensation and growth, do you want to be a part of an initiative that can really make an impact? **Then consider CoCubes!**

India has the largest youth population in the world and we are **NOT** employable. Engineers don't know coding, plumbers don't know plumbing and the education system is broken. Government and large private companies want to fix this and are putting effort left, right and centre to do so. Have a look at this <http://www.clearias.com/pradhan-mantri-kaushal-vikas-yojana-pmkvy/>

Here is TEDx Talk on what is the real problem with employability in India?

The key to fixing this is to measure employability correctly – this requires building a secure assessment system which will work in the fields when testing a farmer for his knowledge on growing bananas to testing in IIT/NIT over student laptops where everyone tries to hack the system.

We need you to build this system with us. We already do a million online assessments a year, and we want to do more. You can look for a steep career growth and you would have the time of your life!

We are looking to hire Associate Software Engineers for the below mentioned roles

Role of Core Development Engineer

- A rock-star in writing code in C/C++.
- Knowledge of STL and Boost libraries would be an added advantage.
- Conceptually clear on Data Structures, Algorithms, Multithreading and Databases.
- Basic understanding of compilers and how they work.

Role of Associate Software Engineer

- A rock-star in writing code in at least one of the scripting languages – Perl / Python / Bash/.Net/C/C++/C#.
- Excellent grasp on the most frequently used Linux /UNIX commands. Example - 'sed', 'awk', 'grep'
- Conceptually clear on Networking and Databases.

Desired Qualifications / Traits

- Good business acumen and analytical / problem solving abilities (including eye for detail)
- Maturity and ability to handle stress and demanding business requirements
- Self driven, persistent, action oriented and goal driven
- Integrity and professionalism in work

Compensation

Candidates shall be eligible for a compensation of 10 LPA depending on their skills and experience.

Interested candidates can write with their updated resume to careers@cocubes.com with 'Application for the role of Associate Software Engineer' in the subject line.

About CoCubes

CoCubes is India's largest assessment and hiring platform. We run assessments to measure employability across all domains – from programming to plumbing.

CoCubes works with 750+ corporate clients to execute entry level and lateral assessments and has access to more than a million candidates through its platform. We run 1 million+ assessments each year in 250+ cities; thus, everyday helping our corporate clients reduce interview bandwidth using our central assessment platform, helping our institutional clients measure and improve employability and helping candidates move ahead on their career path. Our vision is to ensure that everyone in the country gets an equal opportunity to build a career. We are the visionaries of this space with a strong growth trajectory and an exciting firm to be with!

We are a young and passionate team of 65+ people (all of an average age of 27!). We have organizational hierarchies only for fixing accountability across people. The Founders, Leads and all team members use similar workstations. **We DON'T have a single enclosed work cubicle in our office!** We believe in **having fun** at work and with a promise to always be **'Responsibly Relentlessly Resourceful.'**
