

## Corporate Profile- Hiree

---

**Hiree** (erstwhile myNoticePeriod.com) is a Bangalore based online recruitment startup focusing on making the hiring process quick and easy. Hiree pioneered just-in-time hiring and revolutionized recruitment in India and has acquired 800+ paid customers in less than a year. The company works with world's largest IT companies and India's highest valued startups.

The start-up founded in December 2013, is a marketplace that brings together recruiters and potential candidates actively looking to change their jobs. Hiree partners with many top companies to get job seekers hired as soon as possible through the help of their modern, simple application process and the efficient mobile app. With over 2,00,000 job seekers and 1000 active recruiters signed up with them, Hiree has been at the forefront of the recruitment market and continues to grow. Hiree is a well funded company with investments from IDG Ventures which is also an investor in some of the leading startups Flipkart, Yatra, Myntra, Zivame and more.

## Intuitive Product Development @ Hiree

### Why we are different?

We're a young, hungry product startup. We're building an ambitious recruitment platform that will help thousands of jobseekers/users worldwide. This is a rare opportunity to join a growing company early build the product the way you want, using the technologies you love and want to learn.

### Who are we looking for?

Are you a geek who always wanted to build something that's not only cool, but is also meaningful and powerful in its impact? Are you strong in Computer Science fundamentals such as multithreading, oops, data structures, algorithms and operating systems? Do you like solving complex problems with simple solutions that are extensible and scalable? If yes, then we'd love to see you!
