**Role: Full Stack Developer/ Senior Platform Developer**

**Company: My Zupp**

**Location: Mumbai**

**Experience required: 2+**

### **Job Description**

Zupp is an android-based real time carpooling (ride sharing) mobile application in Mumbai, India. It is looking for a senior Platform Developer for its fast growing Team.

### **Responsibilities**

- Develop and maintain cutting edge backend platforms which matches trending industry standards
- Architect the backend such that it supports all the deployed version of Web/Mobile App
- Find out and fix a performance leak and a corner bug is a daily ritual
- Implement new features as per the product improvement/revamp cycle
- Closely working with founders and beating the pace of product development in competition
- Lead a team of junior developers and interns

### **Requirements**

- Minimum 2 years of experience in App/Web backend development. Should have firm grasp of platform requirement when lakhs of concurrent users hog the resources.
- Good working knowledge on SQL and no-SQL databases.
- Must have some hands on experience in cloud solutions like Google App Engine, AWS, Parse
- Optimization freak. Smallest of performance leak can lead to huge cost payable to cloud host. Need an understanding in minimizing the network traffic, algorithmic optimizations, redundancy reduction.
- Data structures and algorithm knowledge, scripting and Linux (mainly Ubuntu) hands on.
- Knowledge on security, reverse proxy settings and load balancing is a huge plus
- Familiarity with tools for code-reviews, version control (git)
- Passionate about great product development and mad about problem solving
- Clear communicator. Must have attitude to say bad a 'bad'.

### **Salary and Benefits**

- 8 lakhs to 14 lakhs per annum
- ESOPs based on performance (Can lead to significant gains)
- Machine and office set up of candidate's choice
- Flexible timings and work-from-home option for max 3 days per week
