

Job brief: Chief Technological Officer

## GD concept snapshot

# Product Vision

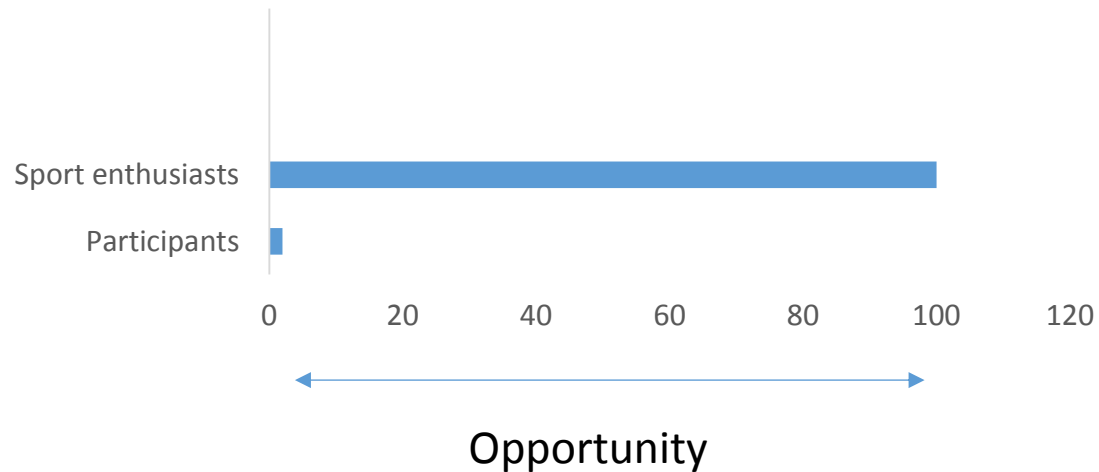

Product Vision: Create a self sustaining ecosystem that relies on our product for recreational sport participation

# Market Opportunity

## Encompassing statement:

We are looking to inject passion & vibrancy into the recreational sports segment that has gone into snooze mode.

2015 Data shows for every 100 sport loving adult in India, only 2 participate in an organized sporting activity.

Make it easier for this lot to find and avail sporting infrastructure

Make it easier for this lot to find competitors

**Make the competition spirited and rewarding**

Mission: To make sport participation sexy again

Vision: To propel innovation in sports at the recreational level

## **Requirement: Chief Technological Officer**

To be part of the early team. To lead the technical charge. To recruit and inspire programming team.

## CTO- End to End Stack + Drafting Technical Vision

Must have:

- Experience in requirement gathering/specification and system architecture design
- Strong software-engineering skills (knowledge of OOP, Design Patterns, TDD)
- Experience with a server-side language/technology (Javascript/NodeJS, Python/Django/Flask, [ASP.NET](#) MVC/C# etc)
- Experience with front end web frameworks (Backbone.js, bootstrap.js) as well as CSS/HTML5
- Strong database(MySQL/PostgreSQL) design and implementation skills.
- Some experience with version control (SVN/GIT)
- Able to pair and work in agile collaboration with designers
- A technical degree from a noteworthy university (JK. Doesn't really matter. Apply even if you are a self taught genius)
- A high level of passion, entrepreneurial energy, personal initiative and responsibility
