LETTER OF APPRECIATION

Dear Sai Uttej Koduri,

I highly appreciate the work you did, from May 15 to July 15, on the burning issue of plastic use, creating awareness around it, and its alternatives. You have done commendable work in ideating a sustainable model to create alternative options to plastic bags and this could go a long way in making the district more sustainable. Your competent work on creating fellowships to involve local students in keeping Srikakulam eco-friendly will be taken forward and I sincerely hope it meets with success. Most importantly, you have done a splendid job in assembling a team of brilliant interns from various backgrounds and regions, a diversity that has resulted in a number of feasible ideas and effective initiatives.

Your in-depth understanding of the issues plaguing plastic use, your succinct presentations to various district officials on these topics, and your patience in field work have been an asset to the team. In persevering through what must have been taxing and, at times, frustrating layers of resistance from various sections of the society, you have displayed great commitment and zeal.

I heartily thank you for your efforts in ideating and realizing various initiatives in tackling plastic use and its discontents. I look forward to working with you again in the future and further utilize your considerable abilities as an organizer. Your intelligence and leadership skills will be highly valued in any organization.

Deep Regards,

(RAMMOHAN NAIDU KINJARAPU)
