

Prof. Volker Sorge Professor Volker Sorge is an applied mathematician and computer scientist. Prof. Sorge is an Endowed Chair Reader in Document Analysis and Accessibility for the School of Computer Science at the University of Birmingham. Prof. Volker has played a pivotal role in the transformation of developing web technology standards, the common practices by STEM publishers and accessibility support workers for visually impaired readers. The work by Dr. Sorge has led to the implementation of production-ready software technology for accessible rendering of mathematics via aural and tactile transcription of formulae. Professor Volker Sorge has kindly agreed to support the vision and mission of Sanchit. In fact, it was through interactions with him that Sanchit learnt about the emerging possibility of rendering graphs, diagrams, and equations more accessible to the blind.
